### Edumid.com [edumid.com](https://edumid.com)

Stack - Flutter, Node js, Mongodb, Digital Ocean

#### A web app for school management

- A web app made with flutter, which as ability to add multiple schools, and all can with login access to staff, teachers and students.
- The app manages everything from daily HomeWorks, Attendance, report card generation (pdf), Hall ticket generation (pdf), Exam Management, teacher remark remarks/ complaints, student time table, upload students data as CSV, and download students data as CSV.
- The app also has features for each school to decide the access control of each user type, and also able to make custom and give particular access.

### MID Card

Stack - Flutter, Node js, Mongodb, Digital Ocean

#### A Mobile App for managing ID card Data and attendance with QR Code

- The app is used to add data of students and teachers for the ID card and once students check and lock the data is send for printing.
- App is used by multiple schools, and each school can choose different fields to be filled from the system provided ones.
- The card also has a QR code which scanned by app scanner used to take attendance, and generate report (pdf).

## Education

### 2018-2022

**B-Tech Information Technology**  
KTU University

### 2023-2025

**Msc. Game Technology**  
Alagappa University

## Id card Designer

Stack - Flutter, Node js, Digital Ocean

**A Web App like photoshop editor used to design ID card**

- The editor enables you to add background image for the card and then texts if needed.
- The editor has access to fields from the database and can be placed on the image, it is then used to download the pdf of all the cards auto generated with the data from database.
